

School News :

Our NET, Dr. Martin John Murray has organized a treasure hunt with clues for S3 students. Students enjoyed the activity very much. The activity was published in SCMP (Young Post) on 19th April, 2021.

Catholic Ming Yuen Secondary School

Catholic Ming Yuen Secondary School students had a different sort of school day recently, away from their desks!

Last Tuesday, S3 students took part in The Great Game organised by our NET, Martin John Murray. It was a unique treasure hunt with clues that were fairly easy to solve.

Our amateur detectives were divided into groups. Each group had to find “dragon balls” of a specific colour.

They had to search the playground and the corridors of the first three floors for the balls. Of course, they also had to crack codes and solve puzzles to get to their treasures.

The first group which successfully collected 12 balls had to

run to the English Corner for their Grand Prize.

Designing a treasure hunt takes a lot of time. However, it offered lots of learning opportunities, meant students had to work together, and certainly was fun. The Great Game was definitely worth the time it took to create and do.
