Each week readers share a story about their BFF and what makes them so special

Best friends until the end

I met my BFF Sugar more than 10 years ago. We always chat, and no matter how far apart we are, we make sure to stay in touch. Whenever we have free time, we meet up and talk about our lives. She also recommends excellent books.

We've watched the summer sunset together, talked all night and listened to songs together. The moments I spend with her are very memorable.

I will never forget our special times together, and I definitely won't forget her! I hope Sugar is always my best friend.

If you would like to tell us about your BFF, send your story to amalisa.hall@scmp.com, as well as your full name, age and school. Feel free to attach a pic of you and pal, including a caption of who's who! All images must be IMB and get permission of your friend or friends to use it.

My best friend is Sakura, and we met in Primary One. We were in the same class all through primary school. We would often talk in class - but we never got caught! At recess, we would laugh and laugh until it was over and we had to get back to class.

Now, we are in different secondary schools. We text a lot and see each other often. She never stops asking me to apply to her school, but I just started at my school and I don't want to move just yet. We sometimes argue about small things, and we even argue about who has the better school!

I think that what we have is a real friendship, and I can't imagine my life without her.

Gabrielle Marie Dabao, 12, Catholic
Ming Yuen Secondary School
